Introduction

This collection of texts and data is a *draft*: it is unfinished and that should be considered when reading it. Special attention should be paid to text marked DRAFT, EDIT, or TK.

This collection of texts and data contains the implementation of my *personal website*, and to a lesser extent an explanation of how and why it works.

This collection of texts and data was created by me, emsenn, in the United States. To the extent possible under law, I have waived all copyright and related or neighboring rights to this document. This document was created for the benefit of the public. If you're viewing it on a remote server, you're encouraged to download your own copy. To learn how you can support me, see https://emsenn.net/donate.

emsenn's Website

Overview

My *personal website* is a *static website*: a collection of unchanging files on a *webserver*, that folk can retrieve. I emphasize the static nature of the site to highlight that there's no interactivity on the site - no comments or anything like that.

I create the files with *Hugo*, a *static site generator*, from information extracted from this file. For instructions on using this file, see the "Operations" section.

Other sections contain the information to I extract:

- "Hugo Configuration" contains *Hugo configuration* that informs *Hugo* and my chosen *Hugo themes*.
- "Git Configuration" contains a few configuration files used by *Git*.
- "Native Content" contains sections that I export with *Ox-Hugo*, into *Hugo*-compatible *Markdown*. The text of the webpage is here, in this document, formatted as *Org-mode* text (for the most part).
- "Native Data" contains sections of *TOML*-serialized data, such as my recent activities and plans.
- [BROKEN LINK: included-content] includes sections that I export with *Ox-Hugo*, but the content itself is inside other files, outside the directory where I keep my website.

Operations

[level-2] [level-2]0

Install This Website

Regardless of how you install this website, you'll need to install *Hugo*, which is not covered in this document.

Install with Git

```
git clone https://git.sr.ht/~emsenn/emsenn-website
```

Install from Org-mode Source This shell script makes all the directories Hugo will expect to have.

```
mkdir -p ../{content,data,static}
```

[level-2]

Hugo Configuration

The configuration below *tangles* to `./build/theme.toml`. Explaining it in detail is beyond the scope of this document. `https://gohugo.io/themes/`

```
# baseURL = "https://emsenn.net"
title = "emsenn"
theme = ["hugo-personal-website-theme"]
[author]
  name = "emsenn"
  homepage = "https://emsenn.net"
```

Git Configuration

Gitignore Configuration

```
hugo
emsenn-website.aux
emsenn-website.log
emsenn-website.out
emsenn-website.toc
```

Gitmodules Configuration

```
[submodule "src/build/themes/hugo-personal-website-theme"]
   path = themes/hugo-personal-website-theme
   url = https://git.sr.ht/~emsenn/hugo-personal-website-theme
```

Native Content

My name is emsenn

I'm a **writer** and **software** developer with a focus on the intersection of the two. This website is a collection of information about me as a person.

Contact

In a hurry? Send an email to emsenn.net.

Overview This website is just one part of my representation online, and doesn't itself provide a means for people to communicate back with me. Below is a list of other digital representations I maintain. Interested in all my accounts? See ["Public Accounts"](*public-accounts*).

Email You can ***send an email*** to either me, privately or to my "public inbox." My private email is emsenn@emsenn.net.

But I prefer to receive messages through my "public inbox," in case whatever you want to say is something others would like to read my response to. And if you're asking a question about a piece of software I've made, you're more likely to get a quick response.

Microblogging I'm active within the *Fediverse*, a network of communication platforms. My main account is at @emsenn@tenforward.social.

Support

I release as much of my work as I can into the *public domain*, so that anyone can use and change it however serves them best. That is made possible with financial contributions from humans like you. Thank you!

I currently accept support through the following platforms:

- One-time through...
  - Paypal
  - Ko-fi
- Recurring through...
  - Liberapay

If there is another service through which you'd like to contribute, please send an email. ***Please note,*** as my work is released into the public domain, financial contributions do not provide access to any "exclusive" content.

Services

Tarot Reading I think ***tarot readings*** can be a wonderful problem-solving tool, regardless of the beliefs of anyone involved: they're a great way for *framing a question in a unique way.*

I've structured my tarot readings like my other consultation sessions: you can click the button below to fill out a short form to apply. If my service seems like a good fit, we can schedule your session. Otherwise, I'll try to refer you to more useful information.

Generally, I consider a tarot reading to be most useful when you *feel* like you're struggling with something, but can't seem to *think* clearly about the problem.

If I accept you for a session, it'll take 30 to 40 minutes. We'll meet through an online video conference, but you don't have to use your microphone or video if you don't want. Afterward, you'll get a brief reporting on the cards that were drawn, and a recording of the session.

> "I wasn't interested in any of the mysticism behind tarot, but it didn't matter: emsenn's reading still helped me understand why I was butting heads with my coworker." – Anonymous Client

To apply for a session, please [send an email](`mailto:emsen@emsenn.net`) containing the following information:

- Some ***personal information***: the *name* you'd like me to call you, and the *pronouns* you'd like me to use in reference to you.
- A mention of ***this service***: Put *Tarot Reading* as your email's subject, or include it prominently in the body.

/(I'm also developing free reading materials on this topic, so please [send an email](`mailto:emsenn@emsenn.net`) if you're interested in receiving updates about that.)/

Projects

Native Data

Recent Activities

```
2019-06-09 = "Started re-doing my personal site in _Hugo_."
2019-06-10 = """
```

```
Read Dan Wang's ["Violence and the Sacred: College as an
incubator of Girardian
terror,"](https://danwang.co/college-girardian-terror/),
which discusses how our sameness leads to fierce and useless
competition. Read Mike Mariani's ["The Tragic, Forgotten History
of
Zombies,"](https://www.theatlantic.com/entertainment/archive/2015/10/how-america-erased
which talks about how America's representation of zombies has
lost its message.
"""
```

Plans

```
soon = [
  "Improve this website.",
]
```
